ASMITA LAMICHHANE

CREATIVE DEVELOPER

Kathmandu, Nepal • +977 9840266372 • aslae0011@gmail.com • GitHub: github.com/Aslae1

PROFILE

Computer Science student and creative developer with hands-on experience building web applications, AI/ML prototypes, computer-vision systems, and creative technology projects. Experienced in turning ideas into practical working prototypes, rapid experimentation, UI/UX, debugging, and collaborative hackathon environments.

TECHNICAL SKILLS

Programming	Python • C • C# • JavaScript • PHP
Web	HTML • CSS • Responsive UI • .NET / ASP.NET Fundamentals
AI / Vision	Neural Networks • OpenCV • MediaPipe
Databases	MySQL • PostgreSQL Fundamentals
Tools	Git • GitHub • VS Code • XAMPP • Docker • Firebase • Supabase
Systems / Creative	Ubuntu / Linux • Blender • 3D Fundamentals • UI/UX

EDUCATION

B.Sc. CSIT — Currently in 6th Semester
Asian School of Management and Technology • Affiliated with Tribhuvan University

SEE — GPA 3.85 • Tarun Madhyamik Vidhyalaya

SLC — GPA 3.66 • Him Rashmi High School

SELECTED PROJECTS

AIRWAY — Air-Writing Recognition System

Python • OpenCV • MediaPipe • Neural Networks

• Built an experimental computer-vision system for real-time hand tracking and air-writing recognition.

• Recognizes characters written through hand gestures and converts them into digital text.

• Combines gesture recognition, neural networks, and real-time computer vision with automatic documentation of recognized output.

• Explores AI, HCI, and natural human-computer interaction.

MOTOCITY — Vehicle Rental Platform

Client Project

• Designed and developed a web-based vehicle rental platform for browsing vehicles, checking availability, and booking rentals.

• Handled the project end-to-end: requirements gathering, interface design, development, and deployment.

• Delivered a working client product focused on usability and practical rental workflows.

NJFON — Neymar Jr. Fan Club Website

Client Project

• Built a responsive online community platform for Neymar Jr. supporters.

• Developed a clean interface for fan content and news and took the project from concept to a working, client-ready website.

HACKATHONS & COMPETITIONS

KOPILA — Youth Skills EdTech Platform • 1st Place • ~30 Teams • January 2025

• Collaborated on an interactive platform teaching children time management, personal finance, and soft skills.

• Contributed to product ideation, UI design, user flow, and implementation under a 6-hour hackathon constraint.

• Achieved 1st place among approximately 30 competing teams.

THE GLITCH — International Solana Hackathon • Team Project

• Participated in an international hackathon and collaborated on development and presentation in a competitive, time-constrained environment.

College Hackathons & Competitions

• Regular participant in college hackathons with experience in rapid ideation, prototyping, teamwork, and project presentation.

• 2nd Place in a college hackathon team project.

CORE STRENGTHS

Creative Problem Solving • Rapid Prototyping • AI & Computer Vision • Full-Stack Project Development • UI/UX & Product Thinking • Independent Research • Team Collaboration • Communication & Presentation • Fast Learning & Adaptability • Project Planning &

Accountability

LANGUAGES & INTERESTS

Languages: Nepali — Native • English — Professional

Interests: Artificial Intelligence & Machine Learning • Web & Software Development • Computer Vision • Human-Computer Interaction • 3D & Blender • Writing & Digital Content
